

BEESU DURGA PRASAD

B.Tech Computer Science Engineering (Cyber Security) | Anurag University | 2027
23eg109a08@anurag.edu.in | +91 93915 16213 | [LinkedIn](#) | [GitHub](#) | Hyderabad, India

CAREER OBJECTIVE

Motivated B.Tech Computer Science (Cyber Security) student with a strong foundation in Java, Python, and core computer science concepts. Passionate about building secure and scalable software applications. Seeking an opportunity as a Software Engineer with a focus on application security while continuously enhancing skills in data structures, system design, and cybersecurity.

EDUCATIONAL QUALIFICATIONS

B.Tech – Computer Science Engineering (Cyber Security) — Anurag University, Ghatkesar

2023 – 2027 | CGPA: 9.35 / 10

Intermediate Public Examination (MPC) — New Chaitanya Junior College, Tarnaka

2021 – 2023 | Marks: 946 / 1000

Secondary School (Class X) — Indira High School, Nacharam

2021 | CGPA: 10.0 / 10

TECHNICAL SKILLS

- **Programming:** Java, Python, C, SQL
- **Core CS:** Data Structures, OOP, DBMS, Operating Systems
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks & Tools:** Spring Boot, IntelliJ IDEA, VS Code
- **Database:** MySQL, SQLite
- **Cyber Security:** Cryptography, Network Security, Secure Coding, Web Application Security

INTERNSHIP EXPERIENCE

Cyber Security Intern — Codec Technologies Pvt. Ltd

June – July 2025

- Developed a Python-based AES-128 encryption tool with Base64 encoding to enhance data security.
- Gained hands-on experience in cryptography and secure coding practices.

PROJECTS

- **Interactive Phishing Simulation & Awareness Platform (INAE Youth Conclave 2025):** Developed a phishing simulation platform with real-world attack scenarios and user behavior tracking to improve awareness and response to phishing attacks.
- **Vulnerability Assessment & Secure Coding Tool:** Developed a web-based tool to detect input validation flaws and common web vulnerabilities, enhancing application security through secure coding practices.
- **Secure Document Verification System:** Built a Spring Boot application using SHA-256 hashing to ensure tamper-proof document verification and data integrity.

- **Movie Ticket Booking System (Java):** Designed an object-oriented application with seat allocation, booking validation, and modular architecture using OOP principles.
- **Movie Ticket Booking System (C):** Developed a console-based application using arrays and structures for efficient ticket booking and seat management.

HACKATHONS

- **Visionova 2K25 (National Level):** Developed a phishing email filtering system using Python, Flask, and HTML.
- **AVENSIS 2K25 (Regional Level):** Built an ambulance dispatch and resource management system using Flask and SQLite.
- **Data Dynamo 2.0 (National Level):** Created a secure document verification platform using Spring Boot with SHA-256 hashing.

CERTIFICATIONS

- Fortinet Certified Fundamentals in Cybersecurity – **Fortinet (2026)**
- Programming in Java (Elite – 90%) – **NPTEL (2025)**
- Python Essentials 1 & 2 – **Cisco (2024)**
- Introduction to Cyber Security – **Cisco (2024)**
- C and Data Structures – **Infosys Springboard (2024)**
- HTML – **Great Learning Academy (2024)**

LEADERSHIP & VOLUNTEERING

- **Treasurer – Cyber Troopers Club:** Managed financial operations and coordinated cybersecurity and technical events.

SOFT SKILLS

- Time Management | Positive Mindset | Self-Motivated | Teamwork & Collaboration | Leadership | Communication

LANGUAGES KNOWN

- English | Telugu | Hindi
